HIMALAYAN NOTES

An international newsletter on the natural history, earth sciences, and the environment of the Himalayas and Tibet. *Himalayan Notes* is in its second year, published currently twice a year in the months of March and September. It was founded in early 1993 by Rasoul Sorkhabi, a geologist at Arizona State University, who has done geological research in the Himalaya during the past seven years. In the absence of a publication of this kind, Sorkhabi launched *Himalayan Notes* to fill this gap in our age of information and global interdependence. The newsletter attempts to provide geologists, geographers, environmentalists, and mountaineers with the latest information on the Himalayan region, to act as an information bridge between Himalayan and foreign scholars and activists, and to focus people's attention on the unique geology and environmental issues of the Himalayan-Tibetan region and how they may be affecting our planet. For more information contact: Dr. Rasoul Sorkhabi, Department of Geology, Arizona State University, Tempe, AZ 85287-1404, USA.

HABITAT HIMALAYA
