Illustrated Atlas of the Himalaya

DAVID ZURICK & JULSUN PACHECO

Winner of the
2006 National
Outdoor Book
Award

139 photographs, 135 maps

“The joy of the *Illustrated Atlas of the Himalaya* is that it offers not only detailed explanations of geology, climate, vegetation, and natural resources, but that it does so in plain English and that it reaches beyond the geophysical and explores the human dimension of the region, which, as we learn, is rich and diverse as the terrain itself.”—*Geographical*

“Combines maps, tables, photography, and text to create a comprehensive atlas of the Himalayas. . . Recommended.”—*Choice*

“Everything you could ever want to know, through words, maps and photographs, about the land and peoples, political divisions and topography of the Himalaya.”
—*Seattle Times*

“Offers a full picture of the land and the people who inhabit it, with a thorough presentation of the culture, economy and politics of the ethnically diverse mountain range, which spans 2,700-kilometers.”
—*San Francisco Chronicle*

“A superb job of assembling a solid mix of data, maps, visuals, and analysis to shed light on the unique features and complex issues found in this mountainous region.”
—*Himalayan Environment*

“Is to a conventional atlas what an illuminated seventeenth-century Bible is to a motel-drawer New Testament . . . handsome, useful maps and informed commentary alone would make the volume worth having.”
—*The Geographical Review*
