Forging Information Literacy Skills with ANVIL:
An innovative game-based approach to teaching information literacy

Ted Mulvey, Information Literacy Librarian
University of Wisconsin Oshkosh

David Hietpas, Library Web Developer
University of Wisconsin Oshkosh
Outline: What we’ll be discussing

- ANVIL Overview
- Institutional Overview
- Reasons for implementation
- Library goals
- Planning process
- Creation guidelines and process
- Software and hardware discussion
- The back end: Categories and content creation
- The front end: How does ANVIL work?
- University implementation
- Faculty and student feedback, next steps
- The back end: management, importing/exporting content
- The back end: Learning management software integration
- Open Source!
What is ANVIL?

- Active iNstructional Videos on Information Literacy
- Series of videos on IL concepts and corresponding trivia-style game
- Developed for General Education Program
- Open source
- LMS Integration
University of Wisconsin Oshkosh: An Overview

- 13,500 full time students
  ○ 2,500-3,000 incoming freshman/year

- Recently underwent general education reform
  ○ Fall 2013
University Studies Program

- Information Literacy: ELO & various stages of program

- 1st year courses
  - designed for HS-College transition

- Participate in variety of HIPs
Library Goals

- Administratively: Integrate into USP, instruction & assessment
- Students: Get in on ground floor of career
  - Importance of library in their education
- Provide non-traditional approaches to IL instruction
Initial planning

● What format?
  ○ More in-person sessions
    ▪ Limited staff
  ○ Humorous, themed videos
    ▪ Massive production concerns
  ○ Standalone tutorials
    ▪ Too static
What about…?

● “Bar trivia”
  ○ Timeless format
  ○ Most students already familiar, game-wise
  ○ Easy to swap themes in and out
What to cover?

- What do 17-18 year olds need to know?
  - Library basics

- ACRL Information Literacy Standards
  - IL basics

- Topics faculty/instructors note are issues
  - Understanding assignments
Subject modules

- Information Cycle
- Understanding your assignment
- Searching for information
- Locating information
- Evaluating information
- Citing and using information
Video creation guidelines

- Try to keep videos around 5 minutes
- Analyze subject content and determine major points
- Plan route through video
Video creation process

- Shoot video
  - Develop script and record
  - Edit video and audio separately
  - Add extras
  - Produce and upload
Production considerations

- Expense: how much could we spend?
- Ease of setup and learning curve
- Recording ability: what does audio sound like during playback?
Recommended software

Camtasia Studio

- No time limit
- Very easy editing interface
- Simple to add in ‘extras’ during editing
- Multiple production options
- Feature for captioning
- Supports multiple audio formats (mp3, wmv)
Recommended microphones

Logitech H390 USB headset

- **Pros:**
  - Affordable (~$30)
  - USB plug-in; no drivers needed to run
  - Mac and Windows
  - Clear recording

- **Cons:**
  - Mike sensitivity
  - Headphones can become uncomfortable
Recommended microphones

Blue Microphones Snowball USB Microphone

● Pros:
  ○ Very clear recording quality
  ○ Little to no sensitivity adjustment
  ○ USB plug-in
  ○ Mac & Windows

● Cons:
  ○ Expense: $70-100
  ○ No headset for playback
Why did we host on YouTube?

- Vital role in today’s information discourse
- Easier to upload and host than University options
Categories, Questions and Answers

- Create content with through-the-web interfaces
- Flexible & Customizable
  - Total questions, time limits, allowed wrong attempts, penalties, etc...
- Screenshots

1) Question

Variations

- What resource would include information about an event as it happens?
- As an event is taking place, which resource below would provide information about that event?
- Resources providing coverage of an event as it occurs are most likely:

Correct Answer

- News website, blog, or Facebook feed

Wrong Answers

- Encyclopedia
- Books
- Scholarly journal article

Post Question Help

As an event happens, remember that information is still very fluid. Print sources such as encyclopedias or books take months or years to publish, and would not be able to provide up-to-date coverage.

2) Question

Variations

- Who produces the types of sources you’d expect to find as an event is occurring?
- The types of sources producing information about an event as it occurs are often:
- When an event is occurring, which of the following sources are likely to produce information?

Correct Answer

- Eyewitnesses, citizens, or professional journalists

Wrong Answers

- Editors of encyclopedias
- Subject-specific experts
- Book publishers

Post Question Help
Managing: Question Set

Question Variations

What resource would include information about an event as it happens?

Path: p

As an event is taking place, which resource below would provide information about that event?

Path: p

Resources providing coverage of an event as it occurs are most likely:

Path: p
As an event happens, remember that information is still very fluid. Print sources such as encyclopedias or books take months or years to publish, and would not be able to provide up-to-date coverage.
Question Variation & Randomization

● Each question set can have 0 to * variations
● Each question set can have 0 to * wrong answers
● Answers are always randomized
● Example:

```
Question Variation: A, B, C, D
1st attempt: B (Random)
2nd attempt: C
3rd attempt: D
4th attempt: A
5th attempt: B (Beginning)
```
Questions and Answers

- Players asked 10 unique questions/module

- Each question has multiple variations

- Answers organized randomly
Playing a module

- Timed format
  - Adds challenge element

- Scores posted to leaderboard
  - Competition motivation
  - Repeat playthroughs reinforce concepts

[Color Problem Areas]
University Implementation

● Presentations
  ○ Freshman writing courses
  ○ University Studies Program committees and workshops
  ○ University assessment committees

● Office of Institutional Research
Marketing

- Student newspaper
- Library newsletter
- Official University news items and interviews
- Items on library homepage
- New faculty events
How are faculty using it?

- For grades
- Optional
- As supplement to traditional IL instruction
How do students like it?

- “Very simple but yet a complex way of studying. It helped me out a lot even though it was only a 10 question little game. Very Helpful!”

- “I played this game until I crushed it!”
Next steps

- Work with upper level courses
  - Advanced IL modules
- Integrate into University curriculum
- Student focus groups
Managing content

New Edit Features and Options are still being added.
Exporting Content

- Exports as a zipped JSON file
Importing Content

- Imports and resolves all Primary/Foreign keys
Export/Import Case

● Export e.g. “Citing Sources-v1.0.0.zip”
  ○ Exported from application using version 1.0.0

● What if you’re running version 1.1.0?
  ○ Import will halt, give you a warning and a solution
  ○ Rename the zip to v1.1.0
    ■ Importer will attempt to bring in the content
    ■ Certain fields may not be included
    ■ Use with caution!
